# Who? What? Where? When?

Help us understand **Why**

## Suffolk Biodiversity Information Service

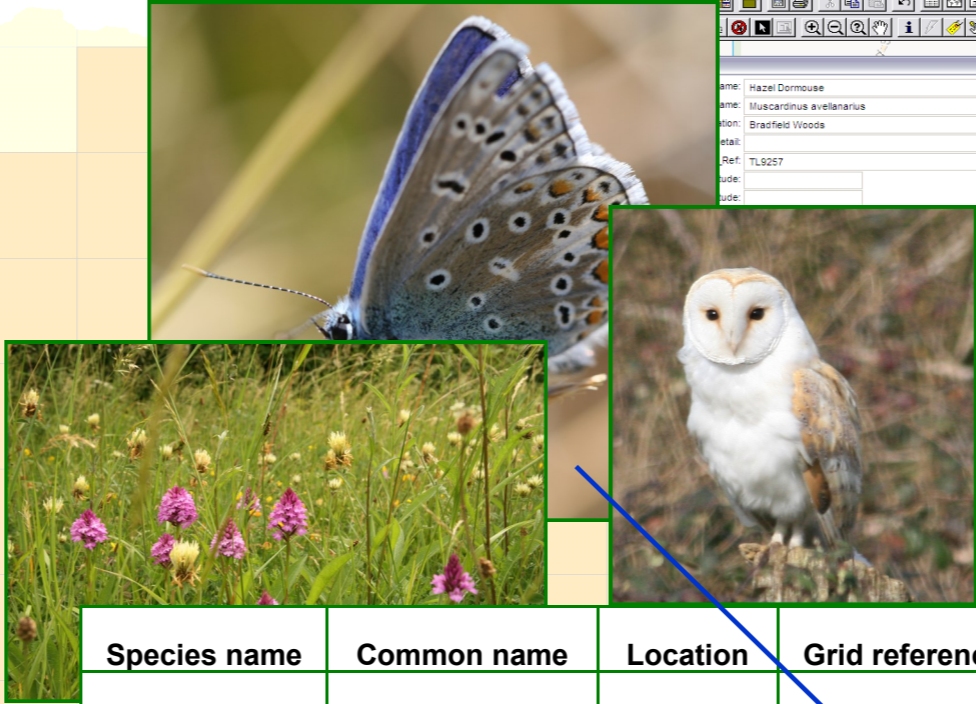

is the one-stop-shop for biological records in Suffolk. Using our database of over 3.5 million records we are able to inform local authorities and conservation organisations on Suffolk's natural history. However without a steady flow of records, this service could not exist.

Anyone can submit a wildlife sighting! Please visit our website <http://www.suffolkbis.org.uk> and download the 'ideal spreadsheet' from our downloads page. This contains all the relevant columns to make a really detailed and valuable record.

Please save a copy of the ideal spreadsheet, fill with records/sightings (1 per row) and return to the Suffolk Biodiversity Information Service by emailing it to;

[martin.sanford@suffolk.gov.uk](mailto:martin.sanford@suffolk.gov.uk)
