Spring 2024

To whom it may concern,

Re: Ancient Woodland Survey Volunteer

The carrier of this letter is volunteering for Suffolk Biodiversity Information Service to undertake woodland surveys. This work forms part of an ongoing project to update the Ancient Woodland Inventory in Suffolk.

Suffolk Biodiversity Information Service would kindly ask that access is granted to woodland areas highlighted for surveying where possible. The evidence collected will provide key insight into the age of these woodland sites.

Volunteers will not access areas without permission and will remain on public rights of way unless explicitly granted access by landowners. Volunteers will be respectful of areas when surveying and will stay no longer than necessary to record/photograph species and document site features.

A copy of any records about sites in your ownership can be provided if required. The full report will be published by Natural England in 2024.

We thank you for any support you can provide.

Kind Regards,
Hannah Alred
